Subject:

Operating System

Submitted to:

Nasir Mahmood

Submitted by:

Afia Maham

Reg number:

23-NTU-CS-1126

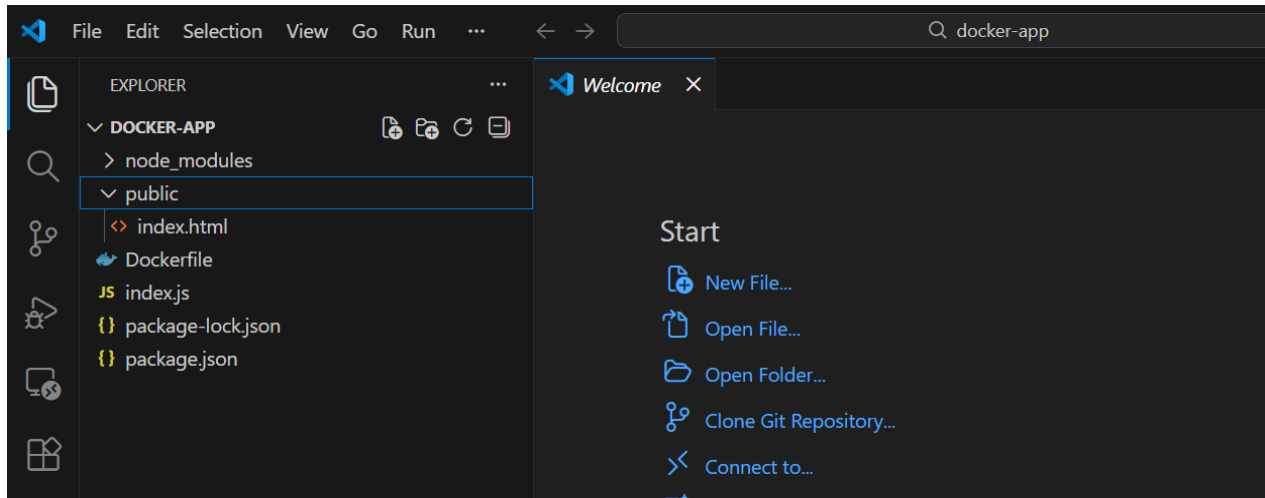

Lab no:

13

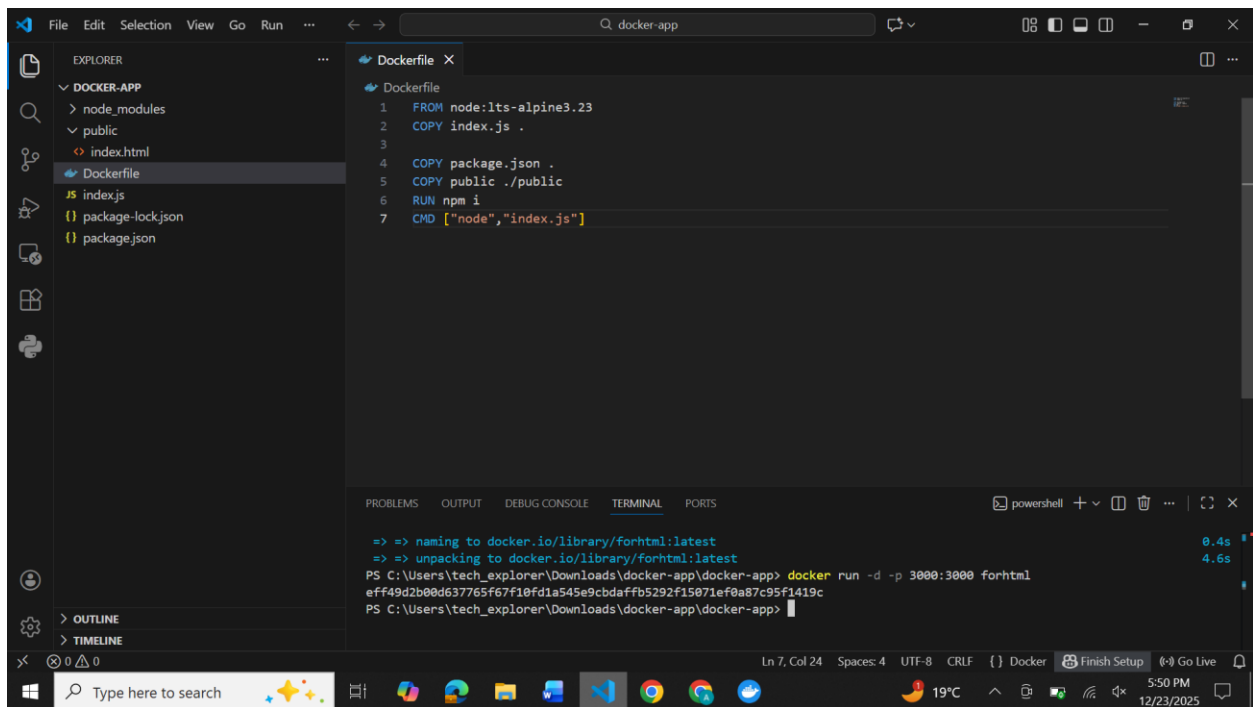

Semester:

5th

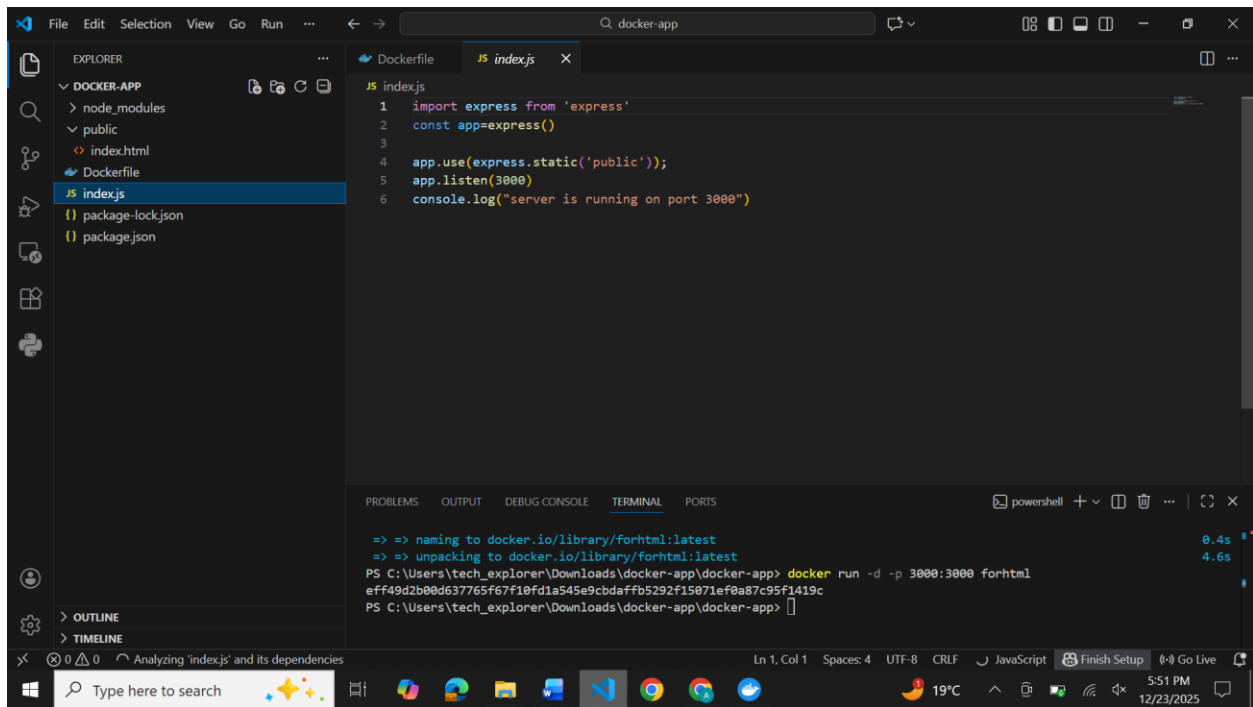

Directory Structure:

Docker file:

Javascript file:

HTML File:

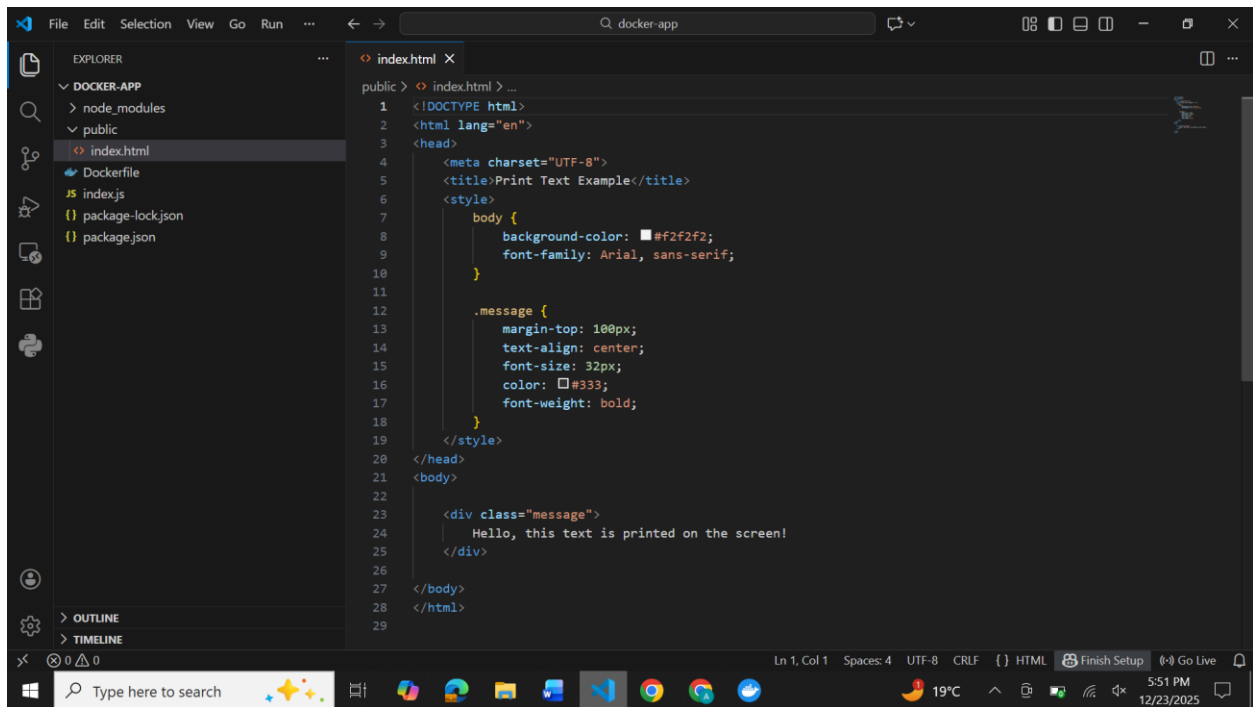

Image creation:

The screenshot shows the Visual Studio Code interface with the Explorer pane on the left displaying the project structure for 'DOCKER-APP', including 'node_modules', 'public', 'index.html', 'Dockerfile', 'index.js', 'package-lock.json', and 'package.json'. The Terminal pane on the right shows the output of the command 'docker build -t forhtml .'. The build process is detailed, showing the resolution of the Dockerfile, the pulling of the 'node:lts-alpine3.23' image, the copying of the context, the copying of the Dockerfile and package files, and the final exporting of the image to 'docker.io/library/forhtml:latest'. The build is completed successfully.

```
PS C:\Users\tech_explorer\Downloads\docker-app\docker-app> docker build -t forhtml .
